I am sending this message to register my strong opinion that the Microsoft case should be settled now and that no more public time, energy or money should be expended in the pursuit of the case.

As a resident of Connecticut I especially deplore the dogged efforts of the Attorney General of Connecticut to depict Microsoft and Bill Gates as Public Enemy Number One.

Surely he and the other attorneys general must have true criminals to pursue. Innovation and energetic enterprise like that of Gates/Microsoft are part of what has made this country the power it is.

"Enough already!"
